

El Picacho del Diablo - East Entry
NOTE: No waypoints are available, but the trailhead is just off the top of this map - refer to Wilson's report from March 2000 in Climber.Org/reports/2000/651.html

El Picacho del Diablo - West Entry

NOTE: Waypoint+ software was used to plot these waypoints, and that plot was scaled to overlay the map. The trailhead waypoints do not appear to match map features, and that area of the map may not be to scale. ALL waypoints are properly represented in angle and distance even if they are slightly off from the features shown on the map.

Refer to the associated trip report for descriptions rather than using the waypoints and features on this map as the gospel truth - look for Eckert's report from May 2001 in Climber.Org/reports/2001/741.html for precise waypoints and details.
